Since I am paying for this service, who are you to say what i get for my money?? If this truly the case, then the local cable companies along with sattelite TV should not be able to provide local information. I feel that I'm paying for the priveledge to hear music uncut and uncensored without commercials(Thank God! or whomever) and if I can get local info without the bull!@#\$\$ then all the better. I'm paying for this, and I'm enjoying it! If you don't like it, then don't subscribe.
